DETAILED ACTION

Examiner's Statement of Reasons for Allowance

1. Claims 1-6 are allowed. The following is an examiner's statement of reasons for allowance: Independent claim 1 teaches an apparatus for relating the position of an electron beam to a mechanical reference comprising an outer support member, an inner support member, and a beam-detecting unit in a reference plate supported by the inner support member, said reference plate comprising a central aperture permitting the passage of the electron beam, a scattering unit for scattering electrons from said electron beam, a detector for detecting electrons scattered from said electron beam by said scattering unit and a set of reference mirrors oriented along said first and second transverse axes, whereby signals from said detector representing the position of said beam relative to said detector may be associated with measurements of the position of said reference mirrors.

2. The prior art fails to teach or reasonably suggest a beam-detecting unit in a reference plate located as described, with the above combination of elements. Claims 2-6 are allowed due to their proper dependence upon and further limiting of Claim 1.

3. This application is in condition for allowance except for the presence of claims 7-20 drawn to claims non-elected without traverse. Accordingly, claims 7-20 been cancelled.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. United States Patent Application Publication 2002/0154839 to Trost and United States Patent Application Publication 2003/0211402 to Hill teach conventional, bottom supported stage and interferometer distance measuring systems.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erin-Michael Gill whose telephone number is 571-272-2471.

The examiner can normally be reached on M-F (8:30-5:00 EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on 571-272-2477. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
